VOLUME XIII. No. 19

EMPRESS, ALTA. THURSDAY, Oct. 8, 1925

Price: \$2.00 Per Year

D. Maxwell's Appeal Allowed

D. Maxwell who entered an appeal against the decision rendered against him in the Calgary Court in reference to ownership of a half-section of land in the Loverna district, has been successful. The land was bequeathed to him under will and the will was contested by Mrs. Holt, daughter of the deceased former owner. Mr. Maxwell received the following telegram on Saturday from his lawyers at Calgary, "Holt appeal argued this week. Stop judgment delivered today, allowing your appeal and dismissing Holt's action with costs."—Loney, Fenerty & McLaurin.

Do it now and do it well.

If you flirt with Satan, you must expect to have a devil of a time.

Has Arm Shattered When Gun Accidentally Discharged

James Powell, of Fortreave, was admitted to the local hospital on Saturday night with a shattered arm. The injury was caused by the accidental discharge of a shot-gun. At present Mr. Powell is resting comfortably.

BIRTHS

Born—To Mr. and Mrs. D. J. Compton, October 4, a son.
Born—To Mr. and Mrs. H. Gravett, Atleo, October 4, a son.
Born—To Mr. and Mrs. A. Hahn, Mendham, October 5, a daughter.
Born—To Mr. and Mrs. P. Brown, Bindloss, October 6, a daughter.

Washington won first game of the "world series" baseball, 4-1, Walter Johnson, pitching.

Free Inoculation For Prevention Diphtheria

An opportunity will be provided through the Local Doctors and the Red Cross Society for the Free Inoculation of all children with serum known as Toxin Anti-Toxin for the prevention of Diphtheria.

This includes all children in the district under, and of, school age.

In order to receive this benefit, parents must make application within two weeks to Mrs. H. H. Hall or Mrs. L. H. Shannon, stating age and number of children they desire to have inoculated.

The day for the above will be published at a future date. There will be no later opportunity for free inoculation.

Candidates in Kinderley and Swift Current Constituencies

W. C. Sutherland, of the Dodsland district, is the liberal nominee in the federal constituency of Kinderley. Rev. R. Walker, of Alsek Conservative candidate and A. M. Carmichael was again nominated by the Progressives.

In the Swift Current federal constituency: A. J. Lewis, M.P., is again the candidate of the Progressives and C. E. Boshwell, lawyer, of Swift Current the Liberal choice.

Before placing your order for Christmas Cards, do not fail to see us. We have a very fine selection. —"EMPRESS," Empress.

United Church

Sunday School, 11 a.m.

Life's call is always, "on to the best." The pursuit of the best cannot be commenced too early—encourage the children to attend Sunday School by influence and example.

Cromwell wrote on the fly-leaf of his Bible, "He who ceases to be better ceases to be good." He content only with a divine discontent that urges us upon self, "Do not content with thy good to rest. Until thy good becomes better and thy better, best."

Public Worship, 7.30. Reverence and devotion in our worship, reaching to the highest, and kept in touch with practical daily living.

Sermon topic, "Two kinds of Sowing and Two Kinds of Harvest." A continuation of last Sunday's message, outlining the Harvest principle.

Good music by Choir. A story sermon for boys and girls.

Prelude.
Vocal solo, "Selected."
Anthem, "When I Shall See Him," by choir—Gabriel.
Offertory.
Violin solo.

Beautiful, 3.30 p.m.

N. W. Whitmore, minister.

Financial Objective of Church

The financial objective of the local board of managers of the United Church for the current year is \$1500. This is a \$200 raise over last year, but it does not mean that money is easier or that there will be a surplus. It means that more is needed. The local United Church expects to receive \$600 assistance from missionary sources, the same as for the past year.

The increase in the local budget will largely be used to wipe out an old loan. Money borrowed from the Missionary Society in 1913 with which to buy property. On this loan of \$450, only \$200 has been repaid. The balance of the debt together with simple interest now stands at \$415.40. This old debt of honor must be liquidated before we can plan for the permanent establishment of the United Church in its own building on lots held for the purpose.

Leishman Clothes
Men who take pride in their appearance and who know the value of being well tailored, always choose Leishman Clothes. These men do not want "just a suit," they want Leishman garments—clothes of the finest. And what a difference these fine clothes make! Cut of the finest materials, tailored and shaped to perfection, they give that air of distinction only found about the tasteful, well dressed, successful man.
If your next suit or top coat is a Leishman, you'll be well dressed until the day you discard it. For Leishman Garments retain their smart lines months after other clothes are worn out.

What the West Means to the East

Western Canada's 1925 crop should have the effect of finally convincing Eastern manufacturers, wholesalers and financiers how largely their success and prosperity is bound up in the progress and prosperity of the agricultural producers of the West, and should open their eyes to the fact that Eastern approval and support of those essentially Western undertakings and policies to further develop and increase our farm production and wealth will result in still larger business and dividends for the East. Artisans and workmen generally find that Eastern industrial centres should become scaled of the same knowledge.

In a review of the business outlook in Canada, The Financial Post, Toronto, says of Ontario: "Wholesale houses feeling effect of much keener demand from Western Canada and looking for healthy business this Fall and Winter in basic lines. Industry speeding up 100 per cent. and over in many cases. Decided failure in unemployment." In Quebec, it is stated, "very little unemployment exists." In British Columbia "huge mining projects are under way, including grain elevators" and "basic industrial conditions are improving gradually." In all provinces the agricultural position is reported better than for many years.

Thus both to the East and the West the effect of prairie production is felt and bringing about marked improvement in the industrial and economic life of the country. Concrete evidence of this betterment is found in the fact that whereas a couple of years ago the heavy manufacturing factories were less than idle, they are now working day and night with full staffs in an effort to fill orders, and the stock of the Company is quoted at a figure double what it was at the beginning of the year. Sawyer-Massey stock has more than doubled since February, while Cockburn-Pine has advanced a 20 per cent. advance.

Analysing operating results for the first five or six months of the year, a Wall Street financial journal recently has shown that the C.P.R. would not earn its full net per cent. dividend this year, but improving business throughout Canada and looking for the best July since 1917, August maintained the improvement, and with the Western crop now moving and business generally speeding up as a result, both the C.P.R. and C.N.R. are expected to make a splendid showing for the year.

The head of a Western company announces as a point of improved conditions his company has disposed of more farm lands in the past five months than in the previous five years. The Hudson's Bay Co. sold more than double the acreage in the first six months of 1925 as compared with the same period last year. An official report of the United States Bureau of Immigration states that the number of farmers settling on the Canadian prairies from a large portion of the United States fifty per cent. greater than for last year, and that the two railway companies and the Hudson's Bay Co. have sold more land in Western Canada than in any similar period for ten years.

The significance of these things should not be lost upon the people of Eastern Canada. There is hardly any limit to the wealth producing power of Western Canada, but those responsible for that production continue to labor under certain handicaps which ought to be removed, and can easily be removed if the people of the East will but take a large national view of the politics and undertakings involved, as for example, an equitable readjustment of freight rates east and west, and the early completion of the Hudson Bay Railway. Anything that will add to the purchasing power of the West, and give a further impetus to its settlement and development, will mean a further large increase in industrial development and prosperity east of the Great Lakes.

No part of Canada stands to suffer quite so much or so quickly from depression in Western agriculture as the provinces of Ontario and Quebec. If the West remains handicapped, its development will suffer and the people here will not reap the full reward of their labor. But they will make a living and can have one. But if the necessary business is not forthcoming to keep their wheels turning, many will never employ it. Eastern factories have no option but to shut down and throw their employees into the ranks of the unemployed. The latter must then emigrate to newer and more promising fields.

Development and prosperity in the West means the hum of activity in Eastern industrial centres. The 1925 Western crop is demonstrating this to be true. The East should benefit itself in its own interests and support those policies and undertakings which assist to make such a condition as nearly permanent as human agencies can make it.

Manitoba Poultry

Odd House Needs Owner

Three Carloads of Live Poultry Shipped to Eastern Points

Three cars of live poultry have been shipped recently from the southern half of the province by Manitoba Co-operative Poultry Marketing Association, states A. C. McCulloch, Dominion livestock branch provincial motor. The birds were shipped in special cars with electric clocks of coops, a centre aisle and storage for eight barrels of water and feed, and a very small grain. One car was shipped to Montreal and the other two to Buffalo.

Plans Flight From London To Cape Town

British Airman Made Flight To India Last Year

Alan Cobham, Great Britain's lone distance airman, is going to attempt a London-Cape Town flight in November. His route will be Paris, Lyons, Athens, Istanbul and Cairo, the course thereafter to be governed by local conditions.

Cobham hopes to reach Cape Town early in December and return to London the same month. Last year Cobham, who is thirty-three years old, completed a 17,600-mile flight to India, carrying as a passenger Sir Robert Branker, the air vice-marshal.

He proposes to use the same type machine as the DME in his flight to Africa.

Mothers' Best Friend In Rearing Children

Pain and sudden sickness are apt to come upon us at any time and safety lies in having always handy the one reliable remedy for all ailments of the "Nervine."

For nearly half a century Nervine has been a family staple and most mothers have come to rely upon it in case of colds, sore throats, and sudden attacks of nervousness and sudden attacks of sickness at the stomach.

For internal or external use, Nervine is worth its weight in gold in every home, and costs but 25 cents at any druggist.

Considering Plan For Rigid Dirigible

Secretary of U. S. Navy Receives Suggestion From Ford

A suggestion by a 20 per cent. advance that the navy department build and experiment with a rigid dirigible designed by his engineers is being given serious consideration by Secretary of Navy Wilbur.

Mr. Wilbur has asked the bureau of aeronautics to examine the project of building a rigid dirigible, which the navy department build and experiment with a rigid dirigible designed by his engineers is being given serious consideration by Secretary of Navy Wilbur.

It is proposed that the ship be 150 feet long, 30 feet in diameter and have a metal gas bag. The cost of one dirigible was placed approximately at \$2,000,000.

The dirigible would have a speed of 70 miles an hour and a cruising range of 2,000 miles.

A GRATEFUL LETTER

From a Lady Made Well by Dr. Williams' Pink Pills

"I wish from my heart I could persuade every person who is run down in health to try Dr. Williams' Pink Pills a trial." This writes Mrs. Leda Mitchell, Oak Point, Minn., who writes: "About a year ago I was a weak woman, suffering from a run-down condition, and I was unable to walk or stand without being weary."

"I can walk and run without stopping every few seconds, and I am now a strong woman. Dr. Williams' Pink Pills will be my standby in the future. I am now a strong woman, and I shall always be grateful to you for the help you have given me."

There are many troubles due to weak blood which can be cured by the use of Dr. Williams' Pink Pills.

It is usually easy to say that when a child is pale, sickly, peevish and restless, the cause is worms. There are, however, many other causes of these symptoms, and preventing the infant from getting the worms is not the only remedy.

Dr. Williams' Pink Pills, by destroying the worms, correct these faults of the digestion and restore the organs to healthy action.

Hold His Record
A Worcestershire man has lived eighty-five years in one house. His record is broken by John Hallan, of Histon, England, who died in his ninety-fifth year in the house in which he was born. He had lived in it all his life.

Oldest Cigar Store
Lancaster, Pa., claims the oldest cigar store in the world. It has been in the family fourth since 1770. The store is a treasure house of relics. It contains the first habitude in Lancaster County, now and in existence.

FOR HEADACHE, BILIOUSNESS, CONSTIPATION, INDIGESTION, KIDNEYS, LIVER, BOWELS.

May Become Apartment House

Italian Engineer Plans to Make Eiffel Tower Greatest Sky-scraper

The Eiffel Tower, in Paris, which today supports what is claimed to be the largest and grandest electric advertising sign in the world, would undergo still another change into something entirely new and different.

It is the idea of M. Carlo Castiglione, Italian engineer responsible for the illumination of the present electrical apparatus, who has adopted the plan.

What he proposes is that the Eiffel Tower should be converted into a sixty-six story apartment house for the special benefit of tourists.

The new building would be constructed by erecting concrete walls about the present structure, and could easily be fitted out with all modern appliances. The floor space would be large for offices, as well as for apartments and rooms, and the result would be the greatest skyscraper in the world, promising for the municipality of Paris a tremendous source of revenue.

These are the views of M. Castiglione, who has said that the plan of converting the tower into an apartment house will be submitted to the competent authorities.

Asst. Ins. to Torture. No one who hasn't gasped for breath in the power of asthma knows what such suffering means. Thousands are afflicted with this terrible disease, and many of them are suffering from it because they do not know how to prevent it.

Dr. J. D. Kellogg's Asthma Remedy, for years it has been relieving the sufferer of this disease. If you are a sufferer do not delay a day in securing this remedy.

British Government Aids Women Flyers

Big Grant For Club Which Has Six Women Members

Flying as a profession has been recognized by the British Government. The London Aero Club, of which six women are members, has been awarded a grant of £2,000 for the purpose of carrying out the air ministry's scheme for a light aeroplane designed for women.

The air ministry has agreed to provide the club with £2,000 worth of equipment and a grant of £1,000 for the purpose of carrying out the air ministry's scheme for a light aeroplane designed for women.

Heavy Grain Exports
15,000,000 Bushels of Wheat Were Exported in August

More than fifteen million bushels of wheat were exported from Canada in August as compared with 13 million in August last year.

Of the amount exported, 10,572,000 bushels went to the United Kingdom and 8,055,000 to the United States.

The United States ports showed a marked increase over August last year, when only 2,544,000 bushels were sent through the same channels. The wheat harvest for August totaled 65,219 barrels as compared with 62,613 barrels last year.

It is usually easy to say that when a child is pale, sickly, peevish and restless, the cause is worms. There are, however, many other causes of these symptoms, and preventing the infant from getting the worms is not the only remedy.

Dr. Williams' Pink Pills, by destroying the worms, correct these faults of the digestion and restore the organs to healthy action.

Absolute Failure
One of His Majesty's Inspectors of Schools in a Sealand city had been testing the children of a very slum district for admission to an institution for the mentally defective.

Walking home, he was met by a narrow street he overheard the policeman comment on his day's doings: "First lady on the doings, 'What's wrong with 'y' woman? You're talking the day.' Second lady on the doings: 'Dear Jane, was examined for an idiot, all she did was to say: 'What's wrong with 'y' woman? You're talking the day.'"

Ask for Minard's and take no other

Agricultural Experts Visit

Agriculturists From U. S. Make Study of Soil Conditions Here

One of the most important parties of agricultural experts to visit Western Canada spent several days in Edmonton, Alberta, and district recently. This party of experts of the United States department of agriculture are making a survey of soil conditions in Western Canada for the purposes of soil maps.

The party included Dr. C. P. Marbut, in charge of soil surveys for the United States government; L. H. Bantz, in charge of the bureau of plant industry; C. R. Hall, assistant in the United States government; O. E. Baker, agricultural economist of the United States department of agriculture; and L. L. Uemslie, assistant in the bureau of plant industry.

Mount Shasta Becoming Active

Volcano in California Causing Alarm To Residing Citizens

Mount Shasta's rumblings are causing some alarm among the citizens of Redding, Calif., and it is feared the volcano is ready to break out into active eruptions. Investigations by the United States bureau of fisheries show that water of the Shasta River is four degrees warmer than normal; that the surface of Mount Shasta is warmer than usual; that the mud flow is increasing, and that grass is dying in the depths of the mountain is believed to be the cause of the peculiar conditions.

Amundsen Will Use Dirigible

Norwegian Explorer Will Again Attempt Flight Over North Pole

Captain Haaud Amundsen's next attempt to fly over the North Pole will be made in an Italian dirigible. It was announced by the commandant of aeroplanes. The dirigible, the N-1, which has been cooled to the Norwegian temperature, is expected to start on its flight, will be operated by an Italian crew. The conditions of the season by the Italian Government have not been made public, but it is not believed the explorer purchased the airship outright, since Italy is to share in the honors of the flight by furnishing the crew.

It will fly the Norwegian flag. By the way, a dirigible, it is not of the balloon type, but is a semi-rigid. It has a capacity of 15,000 cubic meters, is 106 meters long, and 26 wide (about 84 ft by 85 ft) and is equipped with three motors of 245 horsepower, capable of developing a speed of about 62 miles an hour with a cargo of eight tons.

Largest Carpet In World
Sixty-four Oriental Rugs Woven Together Weigh Over 21 Tons

Weighting over twenty-one tons, a large carpeting has been laid down on the floor and restaurant of one of London's leading hotels.

It covers a floor space of half an acre. Seventy men were required to handle it, and it is believed to be the largest in the world.

For the first time in the history of carpet making sixty-four Oriental rugs were woven together. Sixty-two came from Persia and two from China. The weaving was done by rug makers from Samarkand.

According to their customs the workers before the growing carpet was allowed to encircle each rug, wore a piece of colored rice straw placed into the heart of it, to ensure that all the rug threads shall know perpetual joy and felicity.

It Will Prevent Ulcerated Throat.
At the first symptoms of sore throat, which precedes ulceration and inflammation, a spoonful of Dr. Williams' Pink Pills will prevent it. Add a little sugar to it to make it palatable. It will kill the bacteria and prevent the throat from becoming ulcerated and swollen. It is not a painkiller. Those who have tried it will find that it will prevent it.

May Revolutionize Industry
Scientist Claims Concentration of Electrical Energy in Small Object

A scientific discovery that may have revolutionary effect on industry is claimed by A. P. Joffe of the Academy of Science.

Experimenting in his own laboratory, Joffe says he has succeeded in obtaining a tremendous concentration of electrical energy in a very small object. The accumulator, which he constructed and charged with energy "sufficient to drive the most powerful motor car for ten days," is small enough to go into a waistcoat pocket.

Tribute To Genius
Billerio honored for his ability as a composer and artist, Walter Danforth, conductor of New York Symphony Orchestra, has received the following note as proof of his genius:

"Will you kindly call to my aid please!"

Saskatchewan Game

Huge Bag Secured By Nimrod Last Season

A bag of 154,500 ducks, 45,000 prairie chickens, 13,000 partridge, and 5,500 geese, was secured in Saskatchewan, by 5,222 sportsmen, who have complied with the requirements of the Game Act by filling out and returning the coupons attached to the game licenses. Over 10,000 hunters failed to make returns. Assuming that these defaulters shot on an average as many birds as those who returned their coupons, the total bag secured would be 618,000 duck, 130,000 prairie chicken, 51,000 partridge, and 22,000 geese.

STIFFNESS

of any kind can be quickly relieved by massaging with

MINARD'S "KING OF PAIN" LINIMENT

Germany Has New Idea

Increase Dog Taxes to Raise Funds For Opera

In order to defray the opera and make up opera deficits, the rulers of the City of Berlin have proposed an increase in dog taxes from \$10 to \$15. According to Berlin's present canine population, the tax increase would swell the treasury by \$150,000 yearly, they point out. "It is a question whether raising or attending the opera is more lucrative," says one paper, which further proposes adding another political party to the score.

Germany now existing, and make a lower dog tax the party platform. "Love my dog if you want my vote," is suggested.

TEETHING BABIES

Thousands of Them DIE EVERY SUMMER

The hot weather is very hard on babies, and many of them die every summer. On the first sign of any looseness of the bowels the mother should give a few doses of

Dr. FOWLER'S EXT-O-WILD STRAWBERRY

This will quickly effect the diarrhoea, vomiting and purging, and, perhaps save the baby's life. Put up only by The T. Millburn Co., Limited, Toronto, Ont.

Many Women Leaving England According to official figures just made public, 10,000 females, wives or housekeepers, left the British Isles for British North America last year and 4,000 went to Australia. Over 10,000 males migrated last year to British North America to engage in agriculture.

The total number of emigrants from the British Isles in 1924 (60 per cent of the empire was 115,000).

Reviving The Spinning Industry

Women On Vancouver Island Create Interest In Handicraft

Determined to revive the good old days of hand spinning, the women of Vancouver Island have succeeded in creating a widespread interest in spinning and weaving.

Among the first to give impetus to this movement was Mrs. E. J. Macpherson, daughter of Sir James Douglas, first governor of Vancouver Island. Coming of pioneer stock, Mrs. Macpherson could not sit with folded hands and deplore the passing of handicraft; she set about to teach women and girls to weave and knit.

Mrs. E. J. Macpherson has been her first lieutenant in the campaign which is now bearing fruit. Mrs. McKelvey, at her ranch "The Wildcat," Metulish, a few miles from the city of Victoria, went first. She acquired the only flock of black sheep in the province of British Columbia and her Angora goats are also famous for their wool. There is a great growth of Angora goats in British Columbia and for that reason the mohair industry is in its infancy. The scarcity of Angora is due to the fact that their greatest interest is in the wool from Asia Minor and South Africa.

Mrs. McKelvey started modestly with Angora rabbits but she no longer keeps these little animals.

She sees the beginning of a cottage industry in the revival of spinning and weaving on the island of Vancouver Island. She specializes in tweeds, rugs and home furnishings.

Canadians Have No Distinctive Accent

But Great Variety Is Found In Different Localities

Canadians will be surprised to learn that they have a characteristic native accent. Just why people living in various parts of the country and speaking the same language have different accents may be difficult to explain, but it is absurd to speak of a distinctive Canadian accent.

Canada is a big country, geographically speaking, and in the course of time, as the country fills up, different localities will probably develop more or less distinctive accents. The country as a whole will never develop one peculiar accent.

Within the area of the British Isles there are 12,000 square miles, there are dozens of distinctive accents. It would be passing strange if Canada, with an area a trifle less than that of Europe and 25 per cent. of the total area of the British Empire, did not in the course of time develop a variety of accents. Toronto Telegram.

Sleep Is Still Popular

Eight Hours No Any Too Much For Good Health

It has been suggested that the growing prevalence of insomnia is a hopeful sign showing that man is rising from unnecessary and unproductive sleep, that he is about to awake simply because the night was dark. There is no reason for the optimism in this suggestion. The depression of the persons who do not sleep because they cannot is said to be delusive. They believe they ought to sleep, though they are worried by their failure. It is the anxiety that does the harm. Still, the old-fashioned family physician, if there is one left in the world, will tell you that eight hours sleep is a good health result. With all the devices for "fix" manipulation, even in New York retains a remnant of the popularity. New York Herald Tribune.

Canadian Bond Sales

Canadian bond sales since the beginning of the current year to August 31st, amounted in value to \$247,262,515 out of \$774,735,335 government, \$55,252,515 municipal, \$85,485,000 Canadian, and \$104,020,500 railroad. Three bonds have been disposed of in the following markets: Canada, \$10,229,200; United States, \$115,741,900; and Great Britain, \$27,978,320.

Chivalrous

Willie was five years old and went to church every Sunday when he bought other small boys, each one having a penny. But one Sunday he went to church with his mother and when the children was being taken up he asked:

"Ma, have you got a penny?"

"No," said his mother.

"Then take mine," he got under the seat—"Everybody's."

At Last

"Was the prisoner really insane?"

"Not until the cross-examiner got at him."

Everybody Has Ancestors

But Few Can Trace Pedigree Back Very Far

It is a commonplace to say that unknown and self-made men have no ancestors, but everybody has ancestors of countless as the sands on the seashore. Everybody has two parents, four grandparents, eight great-grandparents, and so on. Two generations give 8,192 ancestors in the course of some 200 years.

Three generations, say, to the days of Magna Charta, you would have to reckon with 25,245,600 individuals, scarcely less than the whole present population of England, and any one of them might have left a trace on your character, sanity, strength, or features.

What is known as low birth merit means obscure birth. It means that one or nothing is known about the ancestor. If you were born after the death of grandfathers who made no mark in the world, all you know about your father and mother may have changed to tell. As the average man has what is his grand-mother's maiden name and it is very long odds that he will have no idea of it.

You may be surprised—perhaps assumed to find that the necessity of your pedigree is a matter of no great concern. The pedigree of a nobleman is nearly always available for more than a dozen generations, whereas kings and queens of those days gave their names to historical epochs, can rarely trace back complete pedigrees half so far.

London Has Skyscraper Stable

Well Known Firm Has Saved Horse Housing Problem

The other week, Polonus and Candidate, two champion chestnut horses, were sold privately nine stables from their stable beds in North London and trotted off to the horse show at Richmond.

The well known catering firm that owns Polonus and Candidate have solved their horse housing problem by erecting a stable in a five-story mansion built of fireproof concrete.

A wide concrete staircase, carpeted with red velvet, leads from the street to the stable. Up this the horses walk to bed, and come downstairs to work in the morning. Each floor is divided into two dormitory double rows of stalls separated by wide gangways. Here the horses feed, sleep and are groomed. Large windows give plenty of heat light and ventilation to what must surely be one of the most remarkable stables in London.

Can Appeal To Higher Court

New Regulations For Owners Of Dogs In Britain

All dogs in Britain are to get the right of appeal to a high court against the death sentence in a measure to be introduced in the House of Commons. This will be the one clause in a bill providing that the dog owner may appeal for the destruction of a dog as an animal can automatically be made and sentence suspended until further reasons.

Under the present regulations a dog owner has no recourse if the dog is sentenced to death by a local magistrate. The dog act of 1871, and the 1875 act, and the 1876 act, and the 1877 act, and the 1878 act, and the 1879 act, and the 1880 act, and the 1881 act, and the 1882 act, and the 1883 act, and the 1884 act, WORLD HAPPENINGS
BRIEFLY TOLD

Dr. J. S. Halstead, eldest Free Mason in the United States, and possibly in the world, died recently at the age of 97.

Officials of a safety association have computed the annual "traffic loss" of the United States. It amounts to two billion dollars annually, or \$20 for every citizen.

The importation of Welsh emmentale cheese to supplement supplies of Pennsylvania emmentale during the present strike is being considered in New York.

Mr. Hon. Sir J. Jordan, former British minister in Peking and member of the League of Nations advisory committee, died suddenly at a meeting of the China Association in London.

Robert A. Lear, a West Virginia attorney, having made a bed during the last presidential campaign that David would beat Coolidge, died up by walking 40 miles, Liverpool.

A stamp bearing the likeness of President Wilson will be issued by the United States post office department by the first of December, if the plans of the friends and admirers of the war president succeed.

Manufacture of liquor containing 40 per cent. of alcohol and vodka of 40 per cent. will be permitted in Soviet Russia from October 1, under a decree reached by the central executive committee.

It is announced that the French Government has accepted the invitation of the Toronto Home Show officials to be represented at the tournament in the Ontario city next November.

The United States post office department plans to open eight new air mail routes this fall. Bids for the contracts for the new routes, which are in the south and west, have been opened.

The London Evening News quotes Comptroller Post Office, of H.M. Customs on his way home after a trip to Quebec, as saying: "I talked to Tchichelin and others, and concluded that they are a lot of murderers and thieves."

Pending realization of the League of Nations' hopes of general disarmament, efforts will be made immediately for a gradual reduction of Holland's military forces while maintaining a defence posture in the present international situation.

Britain has entered the stage of "capitalist delinquency" and is "headed for revolution," Leon Trotsky declares in a book entitled "Whither England," an American edition of which has been published in New York.

London To Australia In Week

Two new British airships can carry 140 passengers.

Two airships are now in the course of construction in England which it is claimed will be able to fly to Australia in a week. The two new British airships which are to inaugurate the inter-continental air service will be of 5,000,000 cubic feet capacity, or nearly twice as large as the present fastest airship in the world. Each of the new ships can carry 20 tons, and the R100, Commander Burrell's ship—the other, R101, is being built by the air ministry—will have a capacity for 140 passengers. Though the speed of these ships is around 75 miles an hour, the ships that will follow these pioneers will, according to Burrell's plans, travel at 100 miles an hour, and bring the cost of Australia, 10,000 miles away from Europe and Asia, within four days' time distance from the heart of the empire.

Wonders Of Radio

Photo Transmitted By Radio While Lecture In Broadcast.

What radio-television may finally carry to millions of homes was illustrated in New York at the fourth annual national radio convention at Grand Central Palace, when a photo of Davis Barnoff, vice-president of the Radio Corporation, was transmitted by radio at the same time his address was broadcast.

Barnoff predicted the time when the American farmer would "sit" on an operative performance broadcast from Covent Garden in London, and when a speaker would be heard in every voice into every home equipped with radio.

Many Leaves On Elm Tree

A certain beetle which has given much trouble to the master estimator that a good-sized elm tree with 250 elm, may produce a crop of no fewer than seven million leaves. The combined surface of all these leaves amounts to less than 100,000 square feet.

W. N. E. 1292

A Daring Experiment

Electrical Wizard Believes That Science May rival Nature.

Across the gap between the electrodes of a giant electric machine flashed a pliny of blue-white flame. A terrific crackling roar, the quiet of a Paris laboratory.

Then Prof. Jean Perrin, who, hitherto, has been known as a quiet, unassuming, pleasant voice sounded loud. "It is but the beginning," he said, "of the work of the future."

Such is the report given by Frederic M. Delano in the October Popular Science Monthly, of a remarkable experiment recently completed by Professor Perrin, head of the laboratory of physical research of the famous university of Paris, an experiment that leads this noted French scientist to believe that eventually he will be able to create, in effect, another sun.

"With 10,000 volts of direct current electricity," said Professor Perrin, "I believe I can break up the atomic structure of matter and separate individual atoms; perhaps even drive the nucleus of one atom into another atom and thus create a much denser atom. If I am able to do that the secret of the sun's radiation will have been solved."

It is known, of course, that the sun is formed by the constant churning of the extremely light atoms of hydrogen into atoms of greater weight, such as atoms of oxygen, nitrogen and the other heavier elements. According to his theory—and many other scientists hold the same view—everything in the universe—the sun, the stars, the planets, and everything on them—once consisted of atoms of hydrogen. As these atoms have changed gradually into heavier atoms that make up our atmosphere, our soil, our bones, our bodies, and all the things in the universe.

"In changing into other elements, I believe that hydrogen changes first into helium, which was found in the sun before it was found on earth. In doing so, a portion of its atomic weight is lost, and given off as energy. This released energy comes to us from the sun in the form of light and heat, and makes life possible on earth."

"By hurling against the atomic structure 10,000,000 volts of electricity, I may be able to produce this hydrogen and thus have changed atoms, and thus, in effect, create another sun."

Some of the vast energy released by a great un-producing plant, Professor Perrin predicts, could be captured and transmitted in the form of electricity to run factories and trains, or to provide light and heat for great communities in place of coal and oil.

Canada Is Well Represented

Has Members On Various Committees Of League Of Nations.

The British and Indian are well represented on the various committees of the Assembly of the League of Nations, which met at Geneva last week.

The following Canadians are on committees: Hon. Philippe R. Bouchard, minister of commerce and technical questions and the financial and economic committee; Senator Howitt Bostock, Kuno, B.C., armaments committee; and W. A. Riddell, Canada's permanent representative at the league, in charge of the Canadian bureau, committee on postal questions and committee on political questions.

British Soldier Had To Discard Uniform

Obligated To Wear Civilian Clothes In Irish Free State.

A British soldier of the 10th Battalion, who entered Free State territory at Dundrum, Donegal, in 1921, and, with some of his relatives, was arrested by the Irish Free State authorities, was committed to prison, and was then given a civilian cap and coat and was set free to enjoy his stay in Dundrum. When his soldier's uniform was reported to the Irish Free State authorities, and returned the civilian clothes.

A lunatic, acting as engineer at Dundrum (Irish) Mental Hospital, is reported by the chairman in charge of an ashboiler gang. He has saved the committee over £1,000 by his capability.

In the long buried city of Ur of the Chaldees a place of residence has been found, showing a picture of workmen carrying mortar up ladders.

CLIPSE FASHIONS
Seasonal Patterns
of Haute Couture

A Simple Design For Girls

Girls' dresses adapted to simple lines and often are quite restrained in their ornamentation. The dress in the middle of the page is a simple design for girls, with a high collar and long sleeves. It is made of a light-colored material, possibly silk or satin, and has a simple, elegant design. The dress is shown in a full-length view, and the model is standing with her hands at her sides.

How To Order Patterns

Address—Winning Newspaper Union, 175 McDermott Ave., Winnipeg

Name.....Size.....

Find a Rust-Resisting Variety of Wheat

Great events often are simply chronicled in the newspapers. The chief announcement that the chain of R. S. McAdams, South Dakota wheat grower, to have developed by cross-breeding a variety of wheat that resists all attacks to infect it with rust, has been tested by department of agriculture scientists and found to be a finding of a rust-resistant variety of wheat means literally billions of dollars to the agriculture of the world, as discovery of the disease drought-related wheat means billions of dollars of loss. Such findings are of great importance and have been of public attention than news of the declarations of war or the signing of peace treaties—Fort Worth Star-Telegram.

Baldwin and His Pipe

Break Tension at Critical Point in Negotiations With Miners

The pipe of peace was once more in evidence at a critical point of the recent negotiations between coal miners, owners and the government. When the two sides reached a point where a deadlock seemed inevitable, and the atmosphere was strained and formal, Premier Stanley Baldwin, in his pocket and produced his pipe. This he began slowly to light, remarking: "Let's smoke, shall we?"

The suggestion was adopted by both sides and, curiously, the formality of the strained atmosphere gradually disappeared. Within an hour the basis of a provisional agreement had been reached.

Broadest Carnival Sounds of Fair

Biggest fair will be attempted for the first time. Rousing of the fair, the opening of the fairgrounds, the rousing of pigs, crowing of cocks, mooring of cows, the fair of the Government, it was announced at an executive meeting of the Ottawa Women's Club. The action of the government is the result of a request made by a delegation of women who waited on the privy council last January, asking for a site for a permanent hall, to be used by all national organizations of women throughout the Dominion, irrespective of race or creed. The location of the site has not been decided, but it is understood that it will be a place of considerable prominence in the capital.

When Locusts Stop Flying

A night of locusts will rise to a great height and cover forty or fifty miles in a day. But once the locusts swarm comes to the ground, they will remain, devouring every green thing and never again using its wings.

If Wives are as nice to their husbands as female clerks are to their male clerks, but few matrimonial failures would be recorded.

Wembley Exposition Faces Big Deficit

Estimate Puts Loss At About Three Million Pounds

The British empire exposition at Wembley will prove as great a financial failure as the 1924, it is feared. One estimate puts the loss to the big British fairs guaranteeing the exhibition at £3,000,000.

This pessimistic forecast is based on the rate of attendance to date. It is estimated that although the attendance is only £500,000 persons will have gone to Wembley this year by the time the great fair closes its gates at the end of October. Last year 17,000,000 paid admission, which was half the number needed to make Wembley a financial success.

"The biggest business proposition ever put up by this country is also the biggest failure," says one London newspaper today, attributing the failure to the fact that "Wembley all along has lacked a showman—an inspired autocrat who with the marvelous match at hand could have made it the most successful and stimulating exhibition the world has known. Today Wembley is a tragedy of inept management."

Manitoba Wheat Pool Do Well

Handled Over Eight Million Bushels At Slight Cost

The Manitoba Wheat Pool company handled nearly eight and a half million bushels of wheat last year at an administrative cost of slightly over three-fifths of a cent per bushel. In fact, the best success in co-operation competition to be limited to teacher and college students in rural high schools in the province.

A resolution was unanimously passed, to become effective at the next meeting of the pool, declaring that the best success in co-operation competition to be limited to teacher and college students in rural high schools in the province. A resolution was unanimously passed, to become effective at the next meeting of the pool, declaring that the best success in co-operation competition to be limited to teacher and college students in rural high schools in the province.

Real News

Findings of a Rust-Resisting Variety of Wheat

Great events often are simply chronicled in the newspapers. The chief announcement that the chain of R. S. McAdams, South Dakota wheat grower, to have developed by cross-breeding a variety of wheat that resists all attacks to infect it with rust, has been tested by department of agriculture scientists and found to be a finding of a rust-resistant variety of wheat means literally billions of dollars to the agriculture of the world, as discovery of the disease drought-related wheat means billions of dollars of loss. Such findings are of great importance and have been of public attention than news of the declarations of war or the signing of peace treaties—Fort Worth Star-Telegram.

British Show

Shipment of Manitoba Butter Goes To England

Ten boxes of Manitoba butter have been shipped to England to compete in the 47th annual dairy show of the British Dairy Farmers' Association at the Royal Agricultural Hall, Islington, London.

The classes in which the shipment is entered are the 50-lb. box of salted and 50-lb. box of unsalted butter. One entry in each class has been sent by the Crescent Creamery, Winnipeg; Gallagher, Holman Company, Manitoba Co-operative Dairies, Boreal Lake Creamery and the City Dairy.

The dates of the show are: Oct. 20 to 22, inclusive. Letters recently received from W. A. Wilson, dairy cooperative representative in England, are full of praise for the show, and showing by Canadian exhibitors, as the commercial article is showing decided improvement of late.

To Honor Canada's Womanhood

Site For National Woman's Memorial Hall Is Granted

The site for a national woman's memorial hall has been granted by the Ottawa Women's Club. The action of the government is the result of a request made by a delegation of women who waited on the privy council last January, asking for a site for a permanent hall, to be used by all national organizations of women throughout the Dominion, irrespective of race or creed. The location of the site has not been decided, but it is understood that it will be a place of considerable prominence in the capital.

Ship Lumber to Japan

Thumper export trade from the Pacific coast with Japan has been steadily increasing since the war, and official export figures covering logs, lumber and lumber of all kinds show the following results for the past three years: 1922, 665,000,000 feet; 1923, 742,520,000 feet; and 1924, 820,751,000 feet.

G. Holt Thomas, Buckinghamshire, claims the world's time record in building a house. Thomas, with four men, put up a wooden house of four rooms in ten hours and 45 minutes.

C.N.R. Tourist Traffic Sets New Record

Passenger Traffic This Year Has Surpassed All Previous Records.

Reports presented at a recent meeting of passenger traffic officials of the western region, at Canadian National Railway, held at Jasper Park Lodge, showed that passenger travel this year on both rail and steamship service of the system has surpassed all previous records. Despite the increased accommodation offered this season at Jasper Park Lodge, the quarters have been filled to capacity throughout the summer. This summer the Canadian National entered the Alaska trade with great success, while the development of the Tiangshan Tour, taking in Vancouver, Jasper Park and Prince Rupert has brought a large increase in the Northern Canadian Rockies than ever before. R. Crocman, passenger traffic manager of the region, announced that greater efforts will be made to place Canada before intending tourists and to develop also traffic east and west within the Dominion.

May Prove Successful

Claimed Discovery of Cure For One Form of Cancer.

An article in the Lancet, lending British medical science, Dr. Thomas J. Munden, of the Lister Institute of Preventive Medicine, reports a discovery of a new form of the form of cancer known as sarcoma. The efficacy of the cure is qualified only in that it has thus far only been applied to rats, in which the disease has been transplanted.

The fifty rats, according to Dr. Munden, \$2 per each, have been cured.

Ship Lumber to Japan

Thumper export trade from the Pacific coast with Japan has been steadily increasing since the war, and official export figures covering logs, lumber and lumber of all kinds show the following results for the past three years: 1922, 665,000,000 feet; 1923, 742,520,000 feet; and 1924, 820,751,000 feet.

G. Holt Thomas, Buckinghamshire, claims the world's time record in building a house. Thomas, with four men, put up a wooden house of four rooms in ten hours and 45 minutes.

Five gallons of gasoline has an explosive power equal to 416 pounds of dynamite.

Thursday, Oct. 8, 1935

Mrs. J. McGhee, and son, of Winnipeg, are visiting here with her parents, Mr. and Mrs. C. W. Dawdy.

Geo. Durk, who has been working at Sceptre, Sask., completed his work there, Tuesday of this week.

Alex. McDairmaidie is in town today, renewing old acquaintanceships.

The stormy cold weather of the past week again caused a halt in threshing activities, and acquaintanceship with the coal bin was renewed.

The members of the Castle Coombe W.M.S. will meet at the home of Mrs. Wm. Rowley, on Wednesday, October 14th, at three o'clock.

Weather permitting the River-view Dairy herd together with household furniture, etc., will be sold at Public Auction in Empress, Saturday, October 31. Watch for Sale Bills. Mr. Gordon Longmuir who will continue the business is an experienced stockman and will not doubt make for many of my shortcomings. I ask of you to give him the same loyal support that you have always given me. I thank you.—E. J. Laay.

Mrs. McLeod, sr., has been confined to her bed this week by illness.

Miss Clarkson, teacher of the Cleveland School, was the guest of Mrs. M. G. Boyd over the week end.

J. Boswell, has returned from Sault, Sask., and is nursing an injury to his hand, sustained while working around the engine of a threshing outfit.

A good number of people from Lander and Probate attended the "good times" dance last Friday night. Those present report spending a very enjoyable time.

On Sunday morning next, October 11th, weather permitting, public worship will be held at 11 A. M. W. Whitmore, of Empress. Everybody welcome.

Owing to the long distance and other appointments, worship will commence at 11 o'clock.

Nominations of political candidates for the coming federal election are progressing throughout the country, and there will be many three-cornered fights. However, outside of considerable political bunk slinging, nobody seems greatly excited, and the only one at present apparently able to work up a sweat is the guy sheveling coal.

Planting Joy for Christmas—By putting narcissus and daffodil bulbs in pots of earth now. Home-lover, flower-lover, how does your garden grow? With golden daffodils and snow-white narcissus from Christmas until Tuppertime. Bleak and daisy in January—Not when there are graceful flowers all white and gold upon window-sills and tables. Select your bulbs now while they are in perfect condition and complete assortments. Order from Mrs. Sexton, agent for the Patmore Nurseries.

Return from Trip To New Zealand

C. M. Robb and wife returned this week from New Zealand where they spent the summer visiting Mr. Robb's brother and Mrs. Robb's sister and other relatives. Mr. Robb said they sure had one glorious trip and enjoyed every minute of it. They made the circle tour, via Edmonton, Prince Rupert and Vancouver, where they took the steamer. On their way over they stopped at Honolulu, which he terms the "Garden Spot of the World." He was surprised to find Honolulu a modern city in every respect; resort in mid ocean where visitors from Vancouver, San Francisco, Japan, New Zealand and

Australia spend their vacations. They took a motor drive through the district surrounding the city and visited a mountain with a winding paved road to the top which overlooked a rich, fertile valley of coconuts, bananas and pineapple plantations. After several stops at various islands they reached New Zealand where they spent the greater part of their vacation. New Zealand is an entirely different country from Canada, said Mr. Robb. The grass is green the year round, and the chief industries are sheep raising, dairying, manufacturing. When the war was over the New Zealanders were heavily in debt, but the past few years has been a bonanza to the sheep men as the wool clip has

commanded a very high price. They now have their own woolen mills and turn out the finished products for export trade, while a few years ago the raw material was shipped to England for manufacturing.

Prices, he said, were higher than in Canada on almost everything, including electric light, phones, taxes, etc. The government owns the railroads, telephones and other public utilities, as well as the land and city property. If a person buys a home from the government and after making a payment down, decides to move to some other city or district, the government sells him another house and just transfers the mortgage. Mr. and Mrs. Robb returned on one of the new boats recently placed into service between Australia and Vancouver, which was the first electrically driven

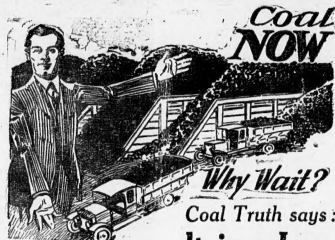

ship on the Pacific.—Mail, Drumheller.

L. Acheson, of Alaska, is the Conservative nominee for the Kindersley constituency, in the place of Rev. Walker, who has resigned.
